Poses

10 Base Poses
Attack 01
Batting 01
Laying Down 01
Running 01
Sitting 01
Stalking 01
Standing 01
Stretching 01
Trotting 01
Walking 01
3 Zero Poses
!Zero All
!Zero Body
!Zero Face

All of the Big Cat's morphs are located in the body group so that you don't have to hunt and peck around trying to find the master control dials for any body part morph.

Morphs:

Tongue Flat morph may not work at 100% when combined with other Tongue morphs or controls at 100%
Extreme morphs (such as Pregnant) may require adjustment of some poses.

Poses:

Poses were created for use with the figure rotation Limits ON. (In Poser, Figure > Use Limits)

Some poses contain expressions. Use the !Zero Face Morph preset to remove those if desired.

Some stretching of textures may occur on the inside of thighs and underside of the hip in extreme poses.

Materials:

HiveWireBig Cat.cr2 file, in Poser, loads with SuperFly Mats applied. Poser 10 & Pro 2014 users will need to apply the Firefly mats after loading.

HiveWireBigCat.duf file and Leopard Base.duf Breed Preset file, in DS, load with Iray Mats applied. DS users will have to manually apply the 3Delight Mats if using the 3Delight render engine.

Special Thanks to CWRW, the HW3D Beta and QAV teams, and the loyal HW3D community, for their help in the development of this figure.
