

# Nuit D' été Simulation Instructions

Preferred method is Timeline

Load Genesis 8 Female

Open the Timeline, change the the maximum frames from 31 to 41

From the Simulation Tab turn **Off** the Start Bone From Memorized Pose

On Frames To Simulate, change it from Current Frame to **Animated (Use Timeline Playrange)**

Move to Frame 30, and pose Genesis 8 Female using your favourite pose, make sure first the pose is simulation friendly.

Move back to Frame 1 and load the whole outfit.

You will start by simulating the Dress, you have to hide the PonShawl and it's Closure, the Necklace and the Pendant.

Start the simulation, once finished, select the Dress, and under Parameters/General/Simulation, turn the Freeze Simulation **On**

Now we go to the PonShawl

Un-hide the PonShawl and the Closure

Start the simulation, once finished, select the PonShawl, and under Parameters/General/Simulation, turn the Freeze Simulation **On**

Now finally the Necklace

Un-hide the Necklace and the Pendant

Start the simulation, once finished, for better results, select the Necklace, under Parameters/Actor/After Simulation you will find two morphs, those add thickness to the cord, one is **Cord Thick Full** and the other one is **Cord Thick Medium**, you can choose which one you want.

Note: For upside down poses, replace the PonShawl for the PonShawl Full Sym, if you want more realistic results, same applies for the Necklace, replace the default one for the Necklace Full Sym
