

# Sailor Simulation Instructions

Preferred method: Timeline

1 Go to the Simulation Settings tab, turn Start Bones From Memorized Pose off, and on Frames To Simulate, select Animated (Use Timeline Play Range)

2 Open Timeline and change the total frames from 31 to 41

3 On frame 1, load Genesis 8 Male, move to frame 30 and pose him using your favourite pose, make sure the pose you use is dForce friendly

4 Move back to frame 1, and load !SailorALL

5 Hide the vest and start the simulation

6 Once finished, while on frame 30, select the pants, go to Parameters/General/Simulation and turn the Freeze Simulation on, do the same with the shirt

7 Go back to frame 1, un-hide the vest and start the simulation

8 Now you are ready to load your scene props, environment, lights and ready to render.
